O: Methods of Instruction

Instructors will collaborate with students in identifying individual learning needs and will facilitate the optimal use of resources to meet these needs. Course topics are addressed through classroom, language/computer lab and online learning activities. Students will reflect on and analyze personal, professional experiences as they relate to course topics.

The instructor will facilitate, observe and evaluate students' participation in class activities. Whole and small group instruction will be combined with individual assistance and student-directed learning. Students will participate in the setting of goals by identifying their communicative and language development needs, and will participate in the selection of learning activities. Students will participate in online discussions of posted reading and listening materials, and submit writing assignments via WebCT.

P: Textbooks and Materials to be Purchased by Students

Students will be provided with materials.

Q: Means of Assessment

Students will be marked on a MAS/NCG basis. Mastery will be granted to students who achieve 70% or higher on the following:

The marks will be apportioned by using the following formula:

In-class assigned learning activities	50%
Online assigned learning activities	35%
Final assessment	15%

R: Prior Learning Assessment and Recognition: specify whether course is open for PLAR

No
